Solutions Built for
Securing Tomorrow

1 SOC Consulting Services

Nothing matches our capability of building or maturing Security Operations Center for your Enterprise. We offer highly advanced processes, trained analysts, procedures and response mechanism to safeguard your infrastructure.

2 Implementation Services

Remote Implementation:
Firewall Configuration, OS Upgrade, Client to site or site to site VPN Connectivity, Cloud Security Solutions, Management Migration and Configuration

On-site Implementation:
All Check Point Solutions can be implemented on-site.

3 DDoS Simulation Services

Proactively validate your defences and strengthen your resistance by simulating DDoS attacks to assess how your existing infrastructure responds to such attacks, and indentify solutions to help mitigate such risks in future.

4 Spearphishing Services

Battle against social engineering tactics and ensure a phishing-free environment. Utilize our special tool to counteract these malicious attempts and safeguard your infrastructure.

5 Preventive Maintenance

We're centered towards securing businesses that run with Check Point. Our preventive maintenance services run by collecting and analyzing specific data for Check Point solution, making businesses safe and more secure.
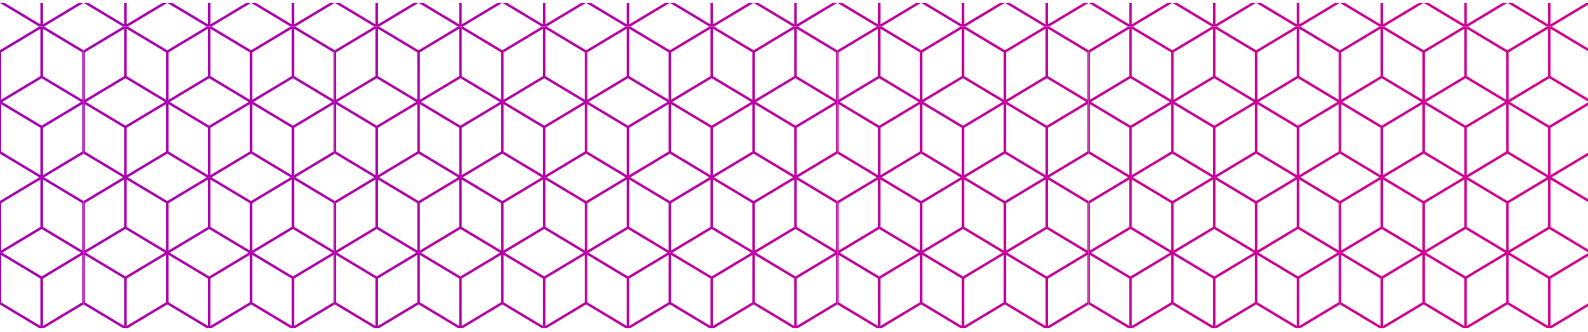

6 Training Services

Check Point Training:
Remote and Onsite: CCSA, CCSE, CCSMA, Advanced Troubleshooting, B25Sandblast, VSEC.
Cyber Security Awareness Programs
Wireshark & Basic Networking Training

Continued....

7   **Advanced Penetration** Testing

Uncover hidden vulnerabilities of your infrastructure by emulating real-world attacks. Find ways to strengthen your defence and enhance your reputation by protecting your customer data and digital infrastructure.

8   **Check Point Security** Solutions

We offer solutions at Network, Gateway and Data Center level, End point, and Cloud.

9   **Malware dSect**

Reverse Malware Engineering Service:
Our process starts by Reverse-engineering the malicious software (malware) that targets common platforms, such as Microsoft Windows and Web browsers. Furthermore, we run Memory Forensics to analyse rootkit infections and files, which have bypassed the Sandbox.

10   **CyberBit Security** Solutions

Our solutions under CyberBit include SOC 3D, Endpoint Detection and Response, and SCADA Shield.
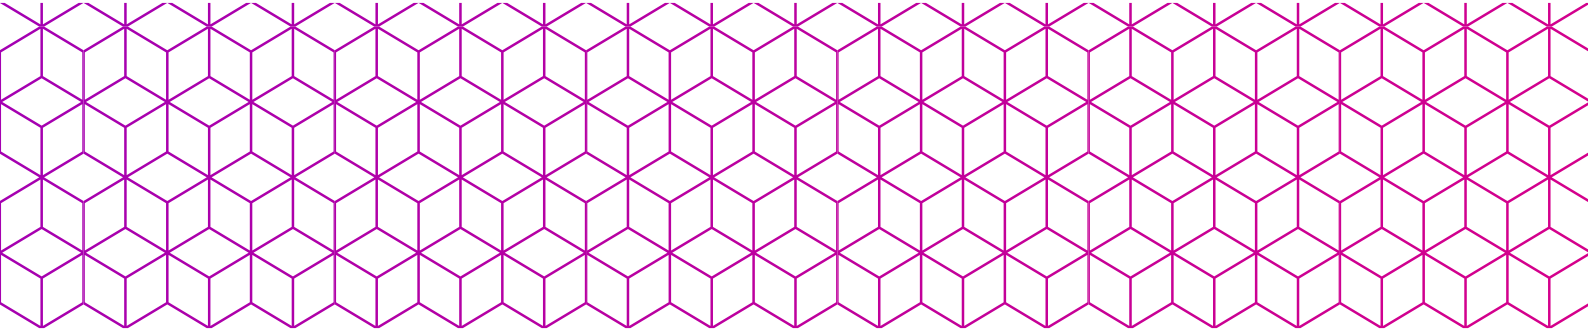

A Portfolio of
Robust Products

fw HEALTH

AI Powered Firewall Health Reporting Tool:

A single tool designed to manage the health of all your Security Gateways. From Health Status of your Check Point device to Hardware Management, our report captures it all. Furthermore, you'll also get information about Memory status, CPU usage and Cluster.

Perform a full body check-up of Check Point gateway, a routine but very critical exercise to fix symptoms before any production outage will take place.
